Investment philosophy of the fund

Focus on going long on listed companies having solid track record, high quality business with strong potential & leadership traits in its products & services, clean management, clear visibility of growth over medium term and comfortable valuations. There would be special emphasis on returns generated by the company on its incremental capital employed (I-ROCE) in recent years and preference would be for companies which have higher I-ROCE vs their past ROCE. Strong focus would be on real cash flows and cash flow yields while selecting stocks. The fund would follow flexi-cap strategy with a bias towards midcap & small cap stocks with a concentrated holding of upto 20 investments.
